JC13 Rec'd PCT/PTO 19 APR 2009

FP318US, EP, CN, KR

AMENDMENT OF CLAIMS UNDER PCT ARTICLE 34(2) (b)

5 1. (Amended) A resin composition comprising:

(A) a lactic acid based resin; and

(B) an aromatic aliphatic polyester having a glass transition temperature (Tg) of 0°C or less and a heat of crystal melting ( $\Delta H_m$ ) of 5 J/g to 30 J/g, and an aliphatic polyester other than the lactic acid based resin, having a glass transition temperature (Tg) of 0°C or less and a heat of crystal melting ( $\Delta H_m$ ) of 5 J/g to 30 J/g, and

(B) the aromatic aliphatic polyester having a glass transition temperature (Tg) of 0°C or less and a heat of crystal melting ( $\Delta H_m$ ) of 5 J/g to 30 J/g, and the aliphatic polyester other than the lactic acid based resin, having a glass transition temperature (Tg) of 0°C or less and a heat of crystal melting ( $\Delta H_m$ ) of 5 J/g to 30 J/g, has a content of 5 mass% to 25 mass%.

20

2. (Amended) A resin composition comprising:

(A) a lactic acid based resin;

(B) an aromatic aliphatic polyester having a glass transition temperature (Tg) of 0°C or less and a heat of crystal melting ( $\Delta H_m$ ) of 5 J/g to 30 J/g, and/or an aliphatic polyester other than the lactic acid based resin, having

a glass transition temperature (Tg) of 0°C or less and a heat of crystal melting ( $\Delta H_m$ ) of 5 J/g to 30 J/g, and  
5 (A) the lactic acid based resin, and (B) the aromatic aliphatic polyester having a glass transition temperature (Tg) of 0°C or less and a heat of crystal melting ( $\Delta H_m$ ) of 5 J/g to 30 J/g, and/or the aliphatic polyester other than the lactic acid based resin, having a glass transition temperature (Tg) of 0°C or less and a heat of crystal melting ( $\Delta H_m$ ) of 5 J/g to 30 J/g, are contained in an amount of 90  
10 mass% to 70 mass%; and

(C) an aliphatic polyester other than the lactic acid based resin, having a glass transition temperature (Tg) of 0°C or less and a heat of crystal melting ( $\Delta H_m$ ) of 50 J/g to 70 J/g, has a content of 10 mass% to 30 mass%, and  
15 (B) the aromatic aliphatic polyester having a glass transition temperature (Tg) of 0°C or less and a heat of crystal melting ( $\Delta H_m$ ) of 5 J/g to 30 J/g, and/or the aliphatic polyester other than the lactic acid based resin, having a glass transition temperature (Tg) of 0°C or less and a heat of crystal melting ( $\Delta H_m$ ) of 5 J/g to 30 J/g, are contained  
20 in an amount of 5 mass% to 25 mass%.

3. The resin composition according to claim 1 or 2, further comprising (D) an inorganic filler having a mean particle size of 1  $\mu\text{m}$  to 5  $\mu\text{m}$  within a range of 5 mass% to 20 mass% of the resin composition.

4. The resin composition according to any one of claims  
1 to 3, further comprising 0.5 mass part to 10 mass parts  
of a carbodiimide compound based on a total of 100 mass parts  
5 of (A) the lactic acid based resin, (B) the aromatic aliphatic  
polyester having a glass transition temperature (Tg) of 0°C  
or less and a heat of crystal melting ( $\Delta H_m$ ) of 5 J/g to 30  
J/g, and/or the aliphatic polyester other than the lactic  
acid based resin, having a glass transition temperature (Tg)  
10 of 0°C or less and a heat of crystal melting ( $\Delta H_m$ ) of 5 J/g  
to 30 J/g, and (C) the aliphatic polyester other than the  
lactic acid based resin, having a glass transition  
temperature (Tg) of 0°C or less and a heat of crystal melting  
( $\Delta H_m$ ) of 50 J/g to 70 J/g.

15

5. The resin composition according to any one of claims  
1 to 4, further comprising 0.5 mass part to 5 mass parts  
of an ester compound having a molecular weight of 200 to  
2,000 based on a total of 100 mass parts of (A) the lactic  
20 acid based resin, (B) the aromatic aliphatic polyester having  
a glass transition temperature (Tg) of 0°C or less and a  
heat of crystal melting ( $\Delta H_m$ ) of 5 J/g to 30 J/g, and/or  
the aliphatic polyester other than the lactic acid based  
resin, having a glass transition temperature (Tg) of 0°C  
25 or less and a heat of crystal melting ( $\Delta H_m$ ) of 5 J/g to 30  
J/g, and (C) the aliphatic polyester other than the lactic

acid based resin, having a glass transition temperature (Tg) of 0°C or less and a heat of crystal melting ( $\Delta H_m$ ) of 50 J/g to 70 J/g.

5    6. The resin composition according to any one of claims 1 to 5, further comprising 0.1 mass part to 5 mass parts of a hiding agent having a refractive index of 2.0 or more based on a total of 100 mass parts of (A) the lactic acid based resin, (B) the aromatic aliphatic polyester having 10 a glass transition temperature (Tg) of 0°C or less and a heat of crystal melting ( $\Delta H_m$ ) of 5 J/g to 30 J/g, and/or the aliphatic polyester other than the lactic acid based resin, having a glass transition temperature (Tg) of 0°C or less and a heat of crystal melting ( $\Delta H_m$ ) of 5 J/g to 30 15 J/g, and (C) the aliphatic polyester other than the lactic acid based resin, having a glass transition temperature (Tg) of 0°C or less and a heat of crystal melting ( $\Delta H_m$ ) of 50 J/g to 70 J/g.

20    7. An injection molded article formed by injection molding the resin composition according to any one of claims 1 to 6.

25    8. The injection molded article according to claim 7, wherein the molded article formed by the injection molding is further crystallized at a temperature within a range of

60°C to 130°C.

9. (Added) A resin composition comprising:

- (A) a lactic acid based resin;
- 5 (B) an aromatic aliphatic polyester having a glass transition temperature (Tg) of 0°C or less and a heat of crystal melting ( $\Delta H_m$ ) of 5 J/g to 30 J/g, or an aliphatic polyester other than the lactic acid based resin, having a glass transition temperature (Tg) of 0°C or less and a heat of crystal melting ( $\Delta H_m$ ) of 5 J/g to 30 J/g, and
- 10 (B) the aromatic aliphatic polyester having a glass transition temperature (Tg) of 0°C or less and a heat of crystal melting ( $\Delta H_m$ ) of 5 J/g to 30 J/g, or the aliphatic polyester other than the lactic acid based resin, having a glass transition temperature (Tg) of 0°C or less and a heat of crystal melting ( $\Delta H_m$ ) of 5 J/g to 30 J/g, has a content of 5 mass% to 25 mass%; and
- 15 (D) an inorganic filler having a mean particle size of 1  $\mu\text{m}$  to 5  $\mu\text{m}$ , has a content of 5 mass% to 20 mass% of the resin composition.

20 10. (Added) A resin composition comprising:

- (A) a lactic acid based resin;
- 25 (B) an aromatic aliphatic polyester having a glass transition temperature (Tg) of 0°C or less and a heat of crystal melting ( $\Delta H_m$ ) of 5 J/g to 30 J/g, or an aliphatic

polyester other than the lactic acid based resin, having a glass transition temperature (Tg) of 0°C or less and a heat of crystal melting ( $\Delta H_m$ ) of 5 J/g to 30 J/g, and  
the above component (B) has a content of 5 mass% to  
5 25 mass%; and

0.5 mass part to 10 mass parts of a carbodiimide compound based on a total of 100 mass parts of the above component (A) and the above component (B).

10 11. (Added) A resin composition comprising:  
(A) a lactic acid based resin;  
(B) an aromatic aliphatic polyester having a glass transition temperature (Tg) of 0°C or less and a heat of crystal melting ( $\Delta H_m$ ) of 5 J/g to 30 J/g, or an aliphatic  
15 polyester other than the lactic acid based resin, having a glass transition temperature (Tg) of 0°C or less and a heat of crystal melting ( $\Delta H_m$ ) of 5 J/g to 30 J/g, and  
the above component (B) has a content of 5 mass% to  
25 mass%; and

20 0.5 mass part to 5 mass parts of an ester compound having a molecular weight of 200 to 2,000 based on a total of 100 mass parts of the above component (A) and the above component (B).

25 12. (Added) A resin composition comprising:  
(A) a lactic acid based resin;

(B) an aromatic aliphatic polyester having a glass transition temperature (Tg) of 0°C or less and a heat of crystal melting ( $\Delta H_m$ ) of 5 J/g to 30 J/g, or an aliphatic polyester other than the lactic acid based resin, having  
5 a glass transition temperature (Tg) of 0°C or less and a heat of crystal melting ( $\Delta H_m$ ) of 5 J/g to 30 J/g, and  
the above component (B) has a content of 5 mass% to 25 mass%; and

0.1 mass part to 5 mass parts of a hiding agent having  
10 a refractive index of 2.0 or more based on a total of 100 mass parts of the above component (A) and the above component (B).

13. (Added) An injection molded article formed by  
15 injection molding the resin composition according to any one of claims 9 to 12.

14. (Added). The injection molded article according to claim 13, wherein the molded article formed by the injection  
20 molding is further crystallized at a temperature within a range of 60°C to 130°C.
